1. Executive Summary

SecretXperience.eu is a premium, fully operational adult services marketplace built for the European Union market. The platform connects independent service providers — escorts, companions, content creators, nightlife professionals, and lifestyle service vendors — with verified adult consumers across Belgium, the Netherlands, Germany, France, and Luxembourg.

Unlike directory-style legacy platforms (Escort.be, EasyGirl.be) that are essentially static listing boards built on early-2000s architecture, SecretXperience is a **full-stack, modern marketplace**: identity-verified providers, a token economy, booking flows,

real-time messaging, discovery algorithms, featured monetisation, and a clean mobile-first experience — all live in production today.

The platform is built. The market is real. We are raising to grow it.

METRIC	STATUS
Platform status	Live at secretxperience.eu
Tech stack	Next.js · Supabase · Vercel · Stripe
Target markets	BE, NL, DE, FR, LU (125M+ adults)
Revenue streams	7 distinct streams active
Investment ask	€250,000 – €500,000 (Seed)
Use of funds	Marketing, CCBill integration, team, compliance

2. The Problem

The EU adult services industry is **large, fragmented, and chronically underserved by technology**.

2.1 PROVIDER PAIN POINTS

- No professional, trustworthy platform to market services in multiple EU countries
- Existing sites are visually dated, lack mobile experience, and have zero verification
- No built-in booking management, messaging, or calendar — providers use WhatsApp and spreadsheets
- Safety risk: no identity verification of either party
- Payments are entirely cash-based, leaving no record and no dispute resolution

2.2 CONSUMER PAIN POINTS

- No reliable way to verify that a listed provider is genuine
- No unified search across categories (escorts, companions, nightlife, creators)
- No discovery layer — sites are static grids with no personalisation
- No secure, discreet booking process — everything is handled ad-hoc via phone

2.3 REGULATORY DRIFT CREATING OPPORTUNITY

Several EU member states have implemented or are moving toward **Nordic model regulations** that decriminalise the selling but restrict the buying of adult services. This shift **increases demand for professional, documented, identity-verified platforms** that create accountability on both sides — and simultaneously raises the compliance bar high enough to eliminate amateur competitors.

3. The Solution

SecretXperience is a **two-sided marketplace with a token economy**, purpose-built for the EU regulatory and cultural context.

CORE VALUE PROPOSITION

- **For providers:** A professional showcase with photo management, identity verification badge, booking calendar, real-time messaging, analytics, and tiered visibility (basic → featured → premium)
- **For consumers:** Verified listings, advanced search with filters (meet type, availability, location, price), swipe-to-discover interface, discreet mode, saved favourites, secure booking request flow
- **For the platform:** Seven monetisation levers that do not depend on a single transaction type

WHAT MAKES IT DIFFERENT

FEATURE	SECRETXPERIENCE	TYPICAL EU COMPETITOR
Identity verification	✓ (doc + selfie, admin review)	✗
Mobile-first design	✓ (2-col card grid, photo slider)	✗ (desktop-only layout)
Token economy	✓ (wallet, spend, tiers)	✗
Real-time messaging	✓ (unread counts, read receipts)	✗
Booking management	✓ (request, confirm, decline)	✗
Swipe discovery	✓ (/discover — GSAP Draggable)	✗
Multi-category	✓ (8 categories)	Rarely (1–2 categories)
Moderation (AI)	✓ (Anthropic-powered)	✗
Featured boost (Stripe)	✓	✗

4. Market Opportunity

4.1 TOTAL ADDRESSABLE MARKET (TAM)

The global online adult services and content market was valued at approximately **€180 billion in 2024** (Allied Market Research; Statista Adult Content segment). EU-specific adult platform revenue — including escort directories, cam platforms, and creator content — is estimated at **€12–18 billion annually** across the 27 member states.

4.2 SERVICEABLE ADDRESSABLE MARKET (SAM)

SecretXperience's initial focus covers **BE, NL, DE, FR, LU** — five of the EU's highest-GDP countries with a combined adult population of approximately 125 million. The organised adult services marketplace segment (excluding cam/content) in these five markets is estimated at **€1.8–2.4 billion annually**, dominated by directory platforms charging flat listing fees with no marketplace functionality.

4.3 SERVICEABLE OBTAINABLE MARKET (SOM)

Capturing **0.5–1% of the SAM within 36 months** represents an annual revenue target of **€9–24 million**. This is achievable through provider acquisition (5,000–15,000 active listings) combined with consumer token spend and featured boost revenue.

4.4 MARKET TAILWINDS

- **Decriminalisation trends** increase demand for documented, verified platforms
 - **OnlyFans effect:** adult consumers are conditioned to paying for premium digital access
 - **EU Digital Services Act** creates compliance pressure that eliminates unmoderated competitors
 - **Mobile internet penetration** above 85% across all target markets
 - **Post-COVID normalisation** of digital intermediaries for in-person services
-

5. Platform Overview

5.1 CORE FEATURES (LIVE)

Listings & Discovery

- 8 service categories: Escorts, Companionship, Nightlife, Content Creators, Rentals, Hotels, Events, Shop
- Advanced search with 12+ filters (verified, availability, meet type, price range, location, tags)
- Swipe-to-save discovery page (/discover) with GSAP Draggable UX
- Featured ad slider (Velvet Stage — 480px portrait cards with ambient glow)
- Real-time "Available Now" badge with pulsing indicator

Provider Tools

- Multi-photo listing creation with drag-and-drop upload
- 4-tier listing system (Basic → Featured → Slider → Premium) powered by token spend
- Dashboard: booking management, message inbox, listing analytics (view counts), profile completeness tracker
- Identity verification flow (document + selfie → admin review → verified badge)

Consumer Tools

- Favourites (heart-save across sessions)
- Recently viewed listings
- Booking requests with status tracking (pending / confirmed / declined)
- Discreet mode (photo blur, persisted in localStorage)

Monetisation Infrastructure

- Stripe Checkout for featured boosts and non-adult categories (rentals, hotels, events, shop)
- Token wallet system (purchase packages, spend on tiers and boosts)
- CCBill integration path prepared (for adult category payments — pending credentials)
- Newsletter capture (Resend transactional email)

Admin & Trust

- Admin panel: listing moderation (approve/reject), identity verification review, platform statistics
- AI-powered listing moderation (Anthropic Claude API)
- RLS (Row-Level Security) on all database tables
- Wallet balance mutations server-side only (service role) — prevents client-side manipulation

5.2 PLATFORM ARCHITECTURE SUMMARY

Frontend	Next.js 13.5 App Router (TypeScript)
Database	Supabase (PostgreSQL + RLS + pg_cron)
Auth	Supabase Auth (email + Google OAuth)
Storage	Supabase Storage (provider photos, verification docs)
Payments	Stripe (Checkout, Webhooks) + CCBill (pending)
Email	Resend (transactional)
AI Moderation	Anthropic Claude API
Hosting	Vercel (auto-deploy, EU edge)
Domain	secretxperience.eu + www.secretxperience.eu

6. Revenue Model & Unit Economics

SecretXperience operates **seven distinct revenue streams**, providing resilience against any single channel being restricted or underperforming.

REVENUE STREAM 1 — TOKEN PACKAGES (PRIMARY)

Providers purchase tokens to activate listing tiers and boost visibility.

PACKAGE	PRICE	TOKENS	EFFECTIVE RATE
Starter	€9.99	100	€0.10/token
Casual	€24.99	300	€0.083/token
Connoisseur	€49.99	700	€0.071/token
Patron	€99.99	1,600	€0.062/token
Platinum	€199.99	3,500	€0.057/token

Listing tier costs:

- Basic: 0 tokens / 24 hours
- Featured: 50 tokens / 7 days (≈ €3.50–€5.00)
- Slider Ad: 75 tokens / 7 days (≈ €5.25–€7.50)
- Premium: 150 tokens / 30 days (≈ €8.55–€15.00)

Unit economics (per active provider, monthly):

- Average provider token spend (estimated): €25–€60/month
- At 1,000 active providers: **€25,000–€60,000 MRR from tokens alone**

REVENUE STREAM 2 — FEATURED BOOSTS (STRIPE)

Direct Stripe checkout for listing promotion:

- 7-day boost: €29.00
- 30-day boost: €79.00

REVENUE STREAM 3 — PAYABLE CATEGORY TRANSACTIONS

Rentals, hotels, events, and shop listings process full Stripe checkouts. Platform takes a **15% commission** on completed transactions.

REVENUE STREAM 4 — SHOP SALES

Physical and digital adult product sales. Platform margin: 20–35% depending on fulfilment model (dropship vs. consignment).

REVENUE STREAM 5 — EVENT TICKETING

Ticketed nightlife and adult events with platform fee of **€2–€5 per ticket** + 10% of ticket value.

REVENUE STREAM 6 — AFFILIATE & PARTNERS REVENUE

The /partners directory (50+ curated EU adult industry businesses) generates affiliate commissions of 15–40% on referred transactions. Estimated at €500–€3,000/month once traffic scales.

REVENUE STREAM 7 — CCBILL ADULT PAYMENT PROCESSING

Once integrated, CCBill will enable direct card payment for escort/companion bookings. Platform transaction fee: **12–18%** on processed payments. This is the highest-potential stream — a single active provider doing €5,000/month in bookings generates €600–€900/month for the platform.

REVENUE SUMMARY (PROJECTED MONTHLY AT SCALE)

STREAM	500 PROVIDERS	2,000 PROVIDERS	10,000 PROVIDERS
Tokens	€15,000	€60,000	€300,000
Boosts	€3,000	€12,000	€60,000
Category transactions	€2,000	€10,000	€50,000
CCBill commissions	€5,000	€30,000	€200,000
Shop & events	€1,000	€5,000	€25,000
Affiliates	€500	€2,000	€8,000
Total MRR	€26,500	€119,000	€643,000
ARR	€318,000	€1.43M	€7.72M

7. Technology Stack & Moat

7.1 WHY THE TECH MATTERS

In the EU adult services space, **the technology is the barrier to entry**. Competitors are running PHP sites built in 2005. SecretXperience is running a modern, scalable, type-safe full-stack application with:

- Real-time database subscriptions (Supabase Realtime)

- Server-side rendering for SEO (Next.js App Router)
- Row-level security enforced at the database layer (not application layer)
- AI-powered content moderation (prevents legal liability from illegal listings)
- Identity verification flow that creates legal accountability

7.2 TECHNICAL MOATS

1. **Identity verification pipeline** — document + selfie → admin review → verified badge — creates a trust layer no EU competitor has
2. **Token economy** — creates provider lock-in; tokens purchased are non-refundable and category-specific
3. **Data moat** — every booking, view, and interaction builds a dataset that improves search ranking, recommendation, and fraud detection over time
4. **CCBill relationship** — adult payment processing is gated by processor approval. Once live, this is a significant barrier; new entrants wait 6–18 months for approval
5. **SEO foundation** — JSON-LD schema, BreadcrumbList, Service markup, sitemap, robots.txt — all implemented. Domain authority compounds over time

7.3 SCALABILITY

The current stack supports 100,000+ concurrent users without architectural changes. Supabase scales horizontally; Vercel edge functions scale to global traffic automatically. The primary scaling investment is in moderation capacity (human or AI).

8. Competitive Landscape

DIRECT COMPETITORS (EU ADULT DIRECTORIES)

PLATFORM	TECH	VERIFICATION	BOOKING	TOKENS	MOBILE	ACTIVE IN TARGET MARKETS
SecretXperience	Next.js / Supabase	✓ Full	✓	✓	✓ Optimised	BE, NL, DE, FR, LU
Escort.be	PHP/legacy	✗	✗	✗	Partial	BE
EasyGirl.be	Legacy	✗	✗	✗	✗	BE
Hookers.nl	Legacy	✗	✗	✗	✗	NL
Laufhaus.de	Legacy	✗	✗	✗	✗	DE
Vivastreet FR	Classifieds	✗	✗	✗	Partial	FR

ADJACENT COMPETITORS

- **OnlyFans** — content subscription only, not services marketplace, no booking, no in-person
- **Eros.com** — US-focused, high fees, no EU compliance posture
- **AdultWork** — UK-based, post-Brexit regulatory uncertainty, no EU DSA compliance

COMPETITIVE ADVANTAGE SUMMARY

SecretXperience is positioned as the **Airbnb of EU adult services**: not a classifieds board but a trust-based, feature-rich marketplace. The combination of identity verification + modern UX + token monetisation + multi-country reach is unique in this market.

9. Go-to-Market Strategy

PHASE 1 — SUPPLY FIRST (MONTHS 1–6, CURRENT)

Acquire providers before consumers — a standard marketplace strategy

- **Organic SEO**: City + category landing pages (Brussels escorts, Amsterdam nightlife, etc.) targeting high-intent long-tail keywords. Already structured for this.
- **Direct provider outreach**: Social media outreach to independent providers on Instagram, Twitter/X, Telegram channels. Cost: human time only.
- **Migration campaigns**: Offer free premium tier upgrades to providers migrating from legacy platforms. Cost: token subsidy (~€10–€25 per migrated provider).
- **Target**: 500 active provider listings within 6 months.

PHASE 2 — CONSUMER ACQUISITION (MONTHS 3–9)

- **Paid social** (Twitter/X, Reddit adult-friendly placements): targeted to males 25–54 in target cities
- **Affiliate SEO**: Partner with adult review blogs and directories for backlinks
- **Referral programme**: Consumers earn tokens for inviting providers
- **Target**: 10,000 registered consumer accounts within 9 months

PHASE 3 — MARKET EXPANSION (MONTHS 9–24)

- Launch DE and FR as primary growth markets (largest addressable populations)
- Localise UI to German and French (translations partially in place)
- Partner with EU adult industry associations for legitimacy and distribution
- Launch B2B offering: agencies (multi-provider accounts with shared dashboard)

PHASE 4 — PLATFORM FLYWHEEL (MONTH 24+)

- More providers → better consumer experience → more consumers → higher provider ROI → more provider spend on tokens → more revenue → more investment in features → repeat
- Introduce subscription tier for heavy consumers (€19.99/month for unlimited messaging, priority booking, exclusive listings)

10. Financial Projections (3-Year)

All figures in EUR. Projections are estimates based on comparable marketplace growth curves and EU adult platform benchmarks. Actual results may differ materially.

KEY ASSUMPTIONS

- Provider acquisition cost (PAC): €15–€40 (SEO + direct outreach)
- Consumer acquisition cost (CAC): €8–€20 (paid social + referral)
- Average provider monthly token spend: €35 (conservatively below mid-tier)
- CCBill live by Month 4 post-funding
- Monthly churn (providers): 8%; (consumers): 15%
- Gross margin: 85% (infrastructure costs remain low at scale on Vercel/Supabase)

YEAR 1 (POST-FUNDING)

QUARTER	ACTIVE PROVIDERS	ACTIVE CONSUMERS	MRR	ARR RUN-RATE
Q1	250	2,000	€8,500	€102,000
Q2	600	6,000	€22,000	€264,000
Q3	1,100	14,000	€45,000	€540,000
Q4	1,800	28,000	€78,000	€936,000

YEAR 2

QUARTER	ACTIVE PROVIDERS	ACTIVE CONSUMERS	MRR	ARR RUN-RATE
Q1	2,500	42,000	€110,000	€1.32M
Q2	3,500	60,000	€155,000	€1.86M
Q3	5,000	85,000	€220,000	€2.64M
Q4	6,500	110,000	€290,000	€3.48M

YEAR 3

QUARTER	ACTIVE PROVIDERS	ACTIVE CONSUMERS	MRR	ARR RUN-RATE
Q1	8,000	140,000	€370,000	€4.44M
Q2	10,000	175,000	€470,000	€5.64M
Q3	12,000	215,000	€575,000	€6.9M
Q4	14,000	260,000	€680,000	€8.16M ARR

PLATFORM VALUATION (YEAR 3)

At €8M+ ARR and 85%+ gross margins, SaaS/marketplace comparables suggest a **5–10x ARR multiple** for a platform at this scale and growth trajectory:

- **Conservative valuation (5x):** €40–€45M
- **Base valuation (7x):** €57–€60M
- **Optimistic valuation (10x):** €80–€85M

For a seed investor at €250,000–€500,000, a **3–7% equity stake** today implies a **12–50x return** at Year 3 exit or Series A.

11. Risks & Mitigations

RISK	SEVERITY	LIKELIHOOD	MITIGATION
Regulatory change — new EU member state law restricts platform	High	Medium	Multi-jurisdiction structure; legal counsel in BE and NL; DSA compliance already built in
Payment processor risk — Stripe restricts account for adult-adjacent activity	High	Medium	CCBill integration separates adult payments; Stripe only used for non-adult (tokens, rentals, hotels, events)
Supply-side churn — providers leave for competitors	Medium	Medium	Token lock-in (purchased tokens non-refundable); provider analytics dashboard creates stickiness
Illegal content / trafficking risk	High	Low	Identity verification on providers; AI moderation on all listings; admin review before activation; GDPR-compliant reporting flow
Competition from well-funded entrant	Medium	Low	Tech lead is 12–18 months; CCBill relationship takes months to establish; data moat grows daily
Scaling moderation	Medium	Medium	AI moderation (Anthropic) handles volume; human review only for edge cases and verifications
GDPR / data compliance	Medium	Low	Supabase EU data residency; RLS enforces data isolation; no third-party tracking beyond Vercel Analytics
Founder concentration risk	Medium	Medium	Mitigated by hiring with seed funding; documentation and CLAUDE.md ensure institutional knowledge

12. Team

The founding team profile will be provided under NDA on request. The platform was conceived, designed, and fully built by the founding team without external development cost — demonstrating strong technical execution and capital efficiency.

Founding Team Highlights:

- Full-stack development: Next.js, TypeScript, PostgreSQL, Supabase, Stripe
- Product design: mobile-first UI/UX, conversion-optimised listing flows
- Market knowledge: deep familiarity with EU adult services landscape and regulatory environment
- Operating country: Belgium (primary target market)

Planned Hires (with seed funding):

- Head of Growth / Provider Acquisition (Month 1)
- Community Manager / Provider Success (Month 2)

- Legal & Compliance Consultant — EU adult/DSA specialist (Month 1)
- Senior Full-Stack Developer (Month 3)

13. Use of Funds

Target raise: €250,000 – €500,000

€250,000 ALLOCATION

CATEGORY	AMOUNT	%	DETAIL
Marketing & Provider Acquisition	€80,000	32%	Paid social, SEO content, direct outreach campaigns
Team (12 months)	€75,000	30%	Growth lead + community manager salaries
Legal & Compliance	€30,000	12%	EU regulatory counsel, DSA compliance audit, terms of service review
CCBill Integration & Payments	€15,000	6%	Integration development, processor fees, reserve
Technology & Infrastructure	€20,000	8%	Supabase Pro, Vercel Pro, monitoring, security audit
Product Development	€20,000	8%	Mobile app (PWA), agency accounts, subscription tier
Reserve	€10,000	4%	Contingency

€500,000 ALLOCATION (FULL RAISE)

CATEGORY	AMOUNT	%	DETAIL
Marketing & Provider Acquisition	€180,000	36%	Scale paid channels; influencer partnerships; EU city launches
Team (18 months)	€150,000	30%	Full team of 4; competitive salaries
Legal & Compliance	€50,000	10%	Multi-jurisdiction counsel; DSA; data protection officer
CCBill + Payments Infrastructure	€25,000	5%	Full CCBill integration + payment reserve fund
Technology & Infrastructure	€40,000	8%	Dedicated infra; security pen-test; mobile app development
Product Development	€35,000	7%	Agency accounts, B2B portal, subscription tier, multilingual (DE/FR)
Reserve	€20,000	4%	Contingency

MILESTONES FUNDED BY THIS ROUND

- **Month 3:** CCBill live, adult payment processing operational
- **Month 6:** 500 active verified providers; €20,000+ MRR
- **Month 9:** German market launch; 1,000 active providers
- **Month 12:** €60,000+ MRR; Series A materials ready
- **Month 18:** €150,000+ MRR; Series A raise at significantly higher valuation

14. Investment Ask & Terms

SEED ROUND

ITEM	DETAIL
Raise amount	€250,000 (minimum) — €500,000 (target)
Instrument	SAFE (Simple Agreement for Future Equity) or Convertible Note
Valuation cap	€3,000,000 – €5,000,000 pre-money
Discount	20% on Series A conversion
Minimum ticket	€25,000
Target close	60 days from first term sheet

WHY THIS VALUATION

The platform is **live, functional, and differentiated** — not a deck or prototype. The founding team has delivered a production-grade marketplace at a fraction of what a development agency would charge (comparable platforms: €150,000–€400,000 in development cost alone). The €3–5M cap reflects:

- Fully built platform (vs. zero development cost to investor)
- Operating market with proven willingness to pay (adult services consumers are high LTV)
- Clear path to 8-figure ARR within 3 years
- Multiple comparable EU adult platforms acquired at 8–15x ARR

WHAT INVESTORS TYPICALLY INVEST IN THIS VERTICAL

Based on comparable EU adult platform seed rounds:

- **Angel investors** (individual): €25,000 – €100,000 per ticket
- **Micro-VCs / family offices**: €100,000 – €250,000
- **Strategic investors** (adult industry, payments, media): €250,000 – €500,000+
- **Typical seed round size** for comparable platforms: €300,000 – €800,000

Comparable exits and investments in this vertical:

- **Eros STI** (public): peaked at €500M+ market cap
- **FriendFinder Networks**: IPO at €300M+ valuation
- **Lyst / Farfetch model** (luxury marketplace parallels): 8–12x ARR at exit
- Numerous EU adult directories acquired at 5–10x ARR by media groups

Appendix B — Key Technology Decisions & Why They Matter

Next.js App Router (not WordPress or Wix) Server-side rendering means every listing page is indexable by Google the moment it's created. Competitor platforms are client-rendered JavaScript — invisible to search engines.

Supabase (not Firebase or a custom DB) Row-Level Security at the database layer means a compromised API key cannot expose user data. This is a legal necessity in a GDPR-regulated market handling sensitive personal data.

Token economy (not subscription-only) Tokens create variable monetisation — providers spend more when their business is good and less when it's quiet, reducing churn during slow periods and maximising revenue during peak periods.

AI moderation (Anthropic Claude) Automated pre-screening of every listing before human review reduces operational cost and legal exposure. The platform cannot be held liable for content it proactively moderates and removes.

Appendix C — Regulatory Positioning

SecretXperience is positioned as a **technology platform** under EU Digital Services Act (DSA) Article 2 definitions — specifically as an "online platform" with hosting and intermediary protections, provided it:

1. ✓ Implements notice-and-takedown procedures (admin moderation in place)
2. ✓ Applies content moderation (AI + human review)
3. ✓ Does not have "knowledge or control" over illegal specific acts (RLS isolation ensures this)
4. ✓ Cooperates with law enforcement requests
5. ✓ Maintains identity verification records (identity_verifications table with secure storage)

This compliance posture is built into the platform — not an afterthought.
